

Energy Manager – Selection Criteria

Role of the Energy Manager

As an integral part of the Energy Management Team, the Energy Manager is responsible for training his/her staff in energy efficiency measures. S/he ensures that the plant and equipment are in good maintenance and are used in the most energy efficient manner. S/he reports any unexpected increase in energy use, such as increased workload, in his/her work area and discusses it with the Energy Efficiency Champion. S/he will report any urgent repair requirements to the Champion without delay and instigate immediate remedial actions.

Selection Criteria

Position in the business:

- Middle Management (e.g. head of department, supervisor)
- Have direct channel of communication with the Champion

Skills & attributes:

- Has some awareness or interest in energy efficiency
- Is willing to learn more about energy use and efficiency
- Good communication skills
- Excellent people skills
- Is willing to be trained and train others in energy efficiency
- Is able to dedicate an hour per month to prepare and present an energy awareness program to his staff
- Is able to dedicate an hour per month to meet with the Champion to discuss energy use in his area
